### PROFILE

I am a recent graduate with a Bachelor's Degree in Information Technology and Digital Innovation (Credit Transfer Program) from Rajamangala University of Technology Rattanakosin, Wang Klai Kangwon Campus. My primary focus is backend development, with hands-on experience in PHP and SQL, gained through several academic projects. I am highly motivated to learn and enhance my skills, especially in real-world applications, and am ready to start within 30 days or sooner if required.

### WORK EXPERIENCE

#### Bookstore Website

NOV 2023 - MAR 2024

HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- Gathered and summarized project requirements, and designed the website using Figma for presentation to instructors.
- Analyzed system requirements, created flowcharts, and collaborated with team members on database design.
- Developed the website in collaboration with the team and performed bug checks and troubleshooting.
- Prepared documentation and user manuals for end-users.

#### Travel Website

JUL 2023 - OCT 2023

HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- Collected project requirements and identified local tourism challenges from residents in the Pran Buri area.
- Designed the website using Adobe XD, developed the system using PHP, and integrated it with a MySQL database.
- Conducted usability testing and refined the site based on feedback.
- Prepared documentation, user manuals, and presented the project to instructors.

#### OTOP Website

NOV 2022 - MAR 2023

HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- Designed the website using Adobe XD according to instructor-specified requirements.
- Developed the system using PHP with a MySQL database, performed usability testing, and resolved any issues.
- Prepared documentation and user manuals, and presented the project to instructors.
